

Formatting the Songs

2-3 lines per slide, break on natural vocal breaks (whether it is a completed phrase or due to natural pacing) include a video with examples?

same with slide breaks, but more extreme (breath = slide break, different phrases/sentences, also according to natural line breaks)

if they are changing fast, consider combining into one slide

slow transitions, break it up, trying to keep time on each slide to be similar without leaving one slide up for too long

pretty instinctive

include link or pdf to complete handbook
